Jovan Jovanovic
Junior Front-End Web Developer

I am a junior front-end web developer who loves building things. My most recent project was a Wordpress website which uses custom made theme (https://glamur.co.rs). I love being completely in control of the code and for that reason, I prefer using vanilla JavaScript over any framework for less complex projects.

CERTIFICATES

Become a Front-End Web Developer
(https://www.linkedin.com/learning/paths/become-a-front-end-web-developer)
• Developed competency with HTML, CSS, JavaScript, and jQuery; Mastered basic version control with Git and GitHub; Applied best practices in responsive design and progressive enhancement

PERSONAL PROJECTS

Custom made WP website and theme (https://glamur.co.rs)
- A website made from scratch. I used both front and back-end technologies. Advanced custom fields, custom contact form, Leaflet maps API, etc.

Typing speed test (https://jovan6jovan.github.io/typing-speed-test/)
- A test that allows you to find out how quickly you can type. Written in vanilla Javascript.

Analog clock (https://jovan6jovan.github.io/analog-clock/)
- An analog clock created using SVG. Javascript is used for its functionality.

Other (unfinished)
- The other (unfinished) projects I created with HTML and CSS can be seen on my Github profile.

EDUCATION

Computer Engineering
School of Electrical and Computer Engineering of Applied Studies

10/2013 – 02/2019   *Belgrade*
